

Extend the life of older CAT generators with a DynaGen RetroKit control panel

COMPARE THE SAVINGS!

Estimated cost of an EMCP replacement:
as high as \$7,500 (INCLUDING LABOR & PARTS)

Estimated cost of a RetroKit installation:
less than \$1,900 (INCLUDING LABOR & PARTS)

That's a potential savings of up to \$5,600 for your customer and up to 12 hours of service labor for you.

Avoid Overpriced Factory Control Panels

The cost of replacing a factory control panel may be too much for some customers, especially if the generator is out-of-warranty. The RetroKit can be installed on virtually any generator and at a fraction of the cost, making it perfect for customers that want to upgrade an older generator.

SAVE TIME WITH ONE COMPLETE PACKAGE!

There won't be any need to contact different suppliers for extra parts, with everything you need shipped in the RetroKit package.

SAVE MONEY FOR YOUR CUSTOMERS

The RetroKit installation will allow your company up to 12 hours of additional installation revenue, while saving your customers thousands of dollars compared to an OEM panel replacement.

ALL THE FUNCTIONALITY YOU NEED

The RetroKit will control everything you need on virtually any installation. Many customers will find more features than before, adding resale value to their older generator.

PROVEN RELIABILITY

DynaGen controllers are proven in the field, and backed with an industry-leading 5 year warranty. This controller will give your customers years of additional service from their machine.

“ We are very pleased with our decision to use the DynaGen RetroKit. They have an excellent product and the customer support is outstanding. Our customers looking to upgrade their older generators get an easy-to-use, reliable product at a cost that made it possible to upgrade their current system for many more years of service. ”

“ The DynaGen RetroKit gives us an affordable and reliable controller with all the functionality our customers demand when upgrading their existing used generators.

Our team loves that the DynaGen RetroKit comes in one complete package with all the sensors & harnesses we might need.

The display panel is easy to read and the controller very easy to use, which is exactly what our customers are looking for.

We've installed many RetroKits over the past 4 years, and always get positive feedback from our customers.

JASON COLE,

FIELD SERVICE SUPERVISOR
MACALLISTER POWER SYSTEMS - CAT

“

We have been very impressed by the DynaGen RetroKit; it's simple to learn and easy to use for our team and customers. Lots of our used generators customers have smaller generators where an OEM panel is simply too big or too expensive to use.

The RetroKit is our go-to product when these kinds of customers want to upgrade. We love the fact that DynaGen controllers are so reliable, and backed by a 5 year warranty.

”
